

# Wire and Cable Assembly Solutions

With decades of application engineering expertise for the long-lasting use of cable connections in all conceivable application areas, MOLTEC International offers its customers comprehensive technical advice and support.

## Who We Are

MOLTEC International (Europe) GmbH a subsidiary of MOLTEC International in Canada, is the consistent development towards global technical and engineering services and values.

With focus on Quality Engineered Solutions for versatile cable management challenges we are your first choice. Especially when it comes to sophisticated engineering and design solutions with subsequent implementation at your convenience.

## Why Choose Us

### Deep Industry Experience

For over 40 years, Moltec has been providing quality engineered solutions for cable protection/ management in many industries.

### Engineering Expertise

We are your technical sparring partner when it comes to state-of-the-art, cost-effective and sustainable system solutions for the use of cables and wires in harsh environments.

### World Class Service

We support you in your projects and share our many years of cable management and routing experience to achieve the best possible results for your applications.

## Our Services

### Engineering Capacities

- Develop solutions for the protection of cables
- Design engineering and prototyping to full production
- Comprehensive application engineering related assessment and advice

### Plug and Play Systems

- Fully assembled plug and play harness solutions
- EMI protected and secure IP69 connections
- Built and supplied to spec

### In-house Production

- Special cable harness assembly
- adaptation to virtually any connector
- Custom adapters and back shells

### Committed Team

- Know-how sharing
- On site assessment and consultation
- Responsive and reliable
