

Quality Engineered Solutions

Exceeding your expectations - is our motivation

Moltec International Europe, located in Switzerland, is the European subsidiary of Moltec International Canada, a leader in the development and design of durable wire and cable management solutions that withstand permanent movements and the harshest environmental conditions.

With over 40 years of experience in the industry, Moltec has established itself as a reliable partner for original equipment manufacturers (OEM's) as well as for maintenance and refurbishment companies worldwide.

We offer comprehensive engineering services for application engineering challenges as well as the implementation of innovative cable connectivity assemblies solutions. Considering appropriate or customer-preferred components that ensure the required safety and endurance of critical electrical systems with the highest reliability.

We develop customized solutions from start to finish in the field of cable management and protection regarding sensitive requirements and critical applications. Precisely tailored to the intended use. We support and accompany our customers projects with all our experience and expertise for lasting and sustainable solutions.

Our offer

Individual cable management solutions		Our expertise in cable management goes far beyond cable protection.
Comprehensive industry and product experience		Specialists in connecting solutions for demanding performance and service life of electrical or data lines.
Engineering consulting and problem solving		Competence in application engineering and development support, including engineering design - fast and reliable.
Engineering and design services		Engineering capacities for the development of cable management solutions.
Independent and technical assessments		Technical consulting for independent application assessments and expert reports.

Our main focus
